

Pratico

System for folding doors

Max 40 kg

Pratico

The new folding-door system Pratico profits from halffinished door posts and standard doors, with a few changes only.

Pratico patented system is the ideal solution to convert already produced swing doors in folding doors. The system is extremely functional, given that it won't be necessary to modify already made outer jambs.

Pratico is always combinable with invisible hinges, handles and locks dedicated to standard swing doors.
