

Scorribase Fluid

Adjustable sliding system for wooden doors

40 ÷ 60 kg

Fluid dampers

Scorribase Fluid

Mechanisms for internal overlapping doors with integrated Fluid system to ensure maximum silence and smoothness when opening and closing the door. Scorribase Fluid is an adjustable sliding system designed for cabinets with internal overlapped doors up to 40 or 60 kg.

The system is featured by sliding trolleys and traditional tracks positioned in the bottom side.

Scorribase Fluid represents the evolution of traditional Scorribase Standard system, thanks to the fluid technology dampers option which allows a smooth and light sliding motion.
