Selfie Vetro

Selfie is the innovative mechanical system for doors with automatic closure, which doesn’t require the use of electrical equipment.

Selfie is an innovative system suitable for glass doors with automatic self closing, which does not require any type of electrical equipment.

The system is available with our Vetro 24, Vetro 40 and Pronto systems, which integrate the innovative Fluid technology: the opening and closing movement is even lighter and more smooth, without the need of any kind of effort.

Finally, the Selfie system is available for mounting on counter frames.
