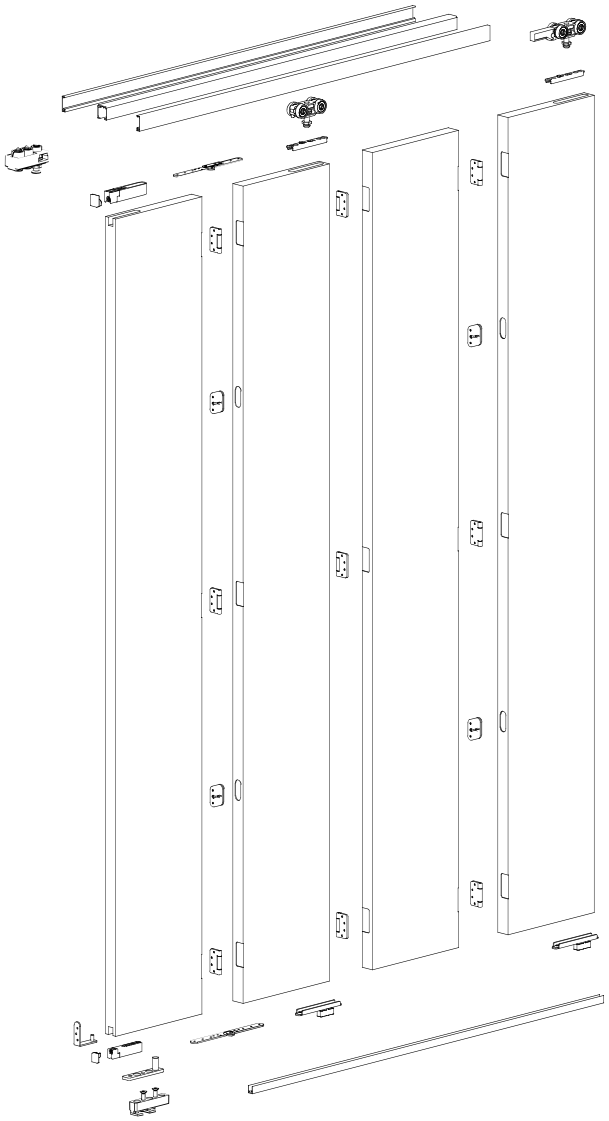
Load capacity up to 80 kg the use of the new track allows for higher load capacities than the systems currently in the catalogue.

Two types of installationthe track can be recessed into the jamb, or fixed externally to the jamb (or under the ceiling).

Reduced top light thanks to the use of the Hide bracket, the gap between the track and the door is only 6 mm, for a formidable aesthetic result.

Fluid Technologythe system's slides integrate patented Fluid technology for extremely smooth and high-performance movements..

Perfectly aligned doorswith door thicknesses of more than 40 mm, the system ensures precise, aligned door packing when opening.


Easy to installthanks to the split bracket, the first part of the door can be attached to the hinges in a few steps, the second part can be easily mounted on the pivot, and the other doors can be installed in the same way.
